

## Special Issue

# Primary Health Care – Challenges and Opportunities for Health Services

### Message from the Guest Editor

Primary health care is the most widely used service in the health system. Primary care service delivery differs from country to country. Primary health care outlets and services offered are crucial for developing a sustainable health system and healthy communities. Although world leaders have made commitments to equitable access and quality primary health care services in various international meetings, the primary health care needs of the people are still not fully met. Even basic health care services are out of reach for some communities. Even if they have in place, various geopolitical and human resource issues have made them very difficult to access. In addition, due to a lack of appropriate equipment, training, and favorable environments, health care providers are not able to provide basic healthcare, and quality is another vital issue. Therefore, an in-depth understanding of the challenges and opportunities of health service delivery and utilization in primary care from both provider and consumer perspectives, is necessary to improve the delivery of primary health care services and people's health.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
