

Special Issue

Health and Wellbeing in Sexual Orientation and Gender Identity

Message from the Guest Editor

We are organising a Special Issue on sexual orientation, gender identity and health in the International Journal of Environmental Research and Public Health. For detailed information on the journal, we refer you to <https://www.mdpi.com/journal/ijerph>. Improving health and wellbeing is an important objective for all who aspire to reducing health inequalities. It is important to understand various factors that contribute to lesbian, gay, bisexual, trans, and similar (LGBT+) groups' mental and physical health and the mediators and moderators of these factors. This Special Issue is open to any subject area regarding sexual orientation, gender identity, and related physical or mental health and wellbeing (please check our list of keywords). We are particularly interested in areas where little previous research has been published, such as interventions for LGBT+ populations to improve mental and physical health and health behaviours, evidence-based approaches to inclusive services, and longitudinal studies on the long-term health impact of puberty blockers or exogenous hormones in trans people.

Guest Editor

Prof. Catherine Meads

School of Nursing & Midwifery, Faculty of Health, Education, Medicine & Social Care, Anglia Ruskin University, Cambridge CB1 1PT, UK

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
