

## Special Issue

# Everybody's Business: Improving Health Systems' Performance to Deliver Value for Patients

### Message from the Guest Editors

This issue of IJERPH focuses on research and experiences related to different aspects of health systems' performance and measurement. This may include a description of new system challenges and value-based care models, approaches, methods, and instruments to assess provider efficiency and patient satisfaction, hospital value-based purchasing, payers cost control and risk reduction, management of a chronic condition, disease self-management, managing relationships among health sector stakeholders, coordinating and integrating health care delivery. This Special Issue welcomes contributions presenting both conceptual frameworks, systematic literature reviews, as well as empirical results of implementing a patient-centered approach, presenting evidence of reduced health spending and better health outcomes, managing of patients' experiences, and assessing the strengthening health systems through a value-based approach, both from a macro- and micro-perspectives. We invite researchers in health economics, management, quality assurance, public health, and other social sciences to submit high quality papers related to the issues in this research area.

### Guest Editors

Prof. Dr. Iga Rudawska

Uniwersytet Szczeciński, Szczecin, Poland

Dr. Jahangir A. M. Khan

Liverpool School of Tropical Medicine, Pembroke Place, Liverpool L3 5QA, UK

Prof. Dr. Judith E. Arnetz

Department of Family Medicine, College of Human Medicine, Michigan State University, College of Human Medicine, East Lansing, USA

### Deadline for manuscript submissions

closed (30 June 2021)

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
