

## Special Issue

# Health Technology Assessment

### Message from the Guest Editors

Health technology assessment (HTA) is a multidisciplinary process that summarizes information about the medical, social, economic, and ethical issues related to the use of a health technology in a systematic, transparent, unbiased, and robust manner. A health technology is defined by the WHO as “the application of organized knowledge and skills in the form of medicines, medical devices, vaccines, procedures and systems developed to solve a health problem and improve quality of life”. (EunetHTA.2016; WHO 2007). HTA aims to inform policy in order to improve the performance of health systems using robust evidence-based approaches to make clear, consistent recommendations about which health technologies to use and for which patients. This supports quality improvement and efficiency throughout healthcare services (EUPATI, 2016). The role of HTA is presently becoming more and more important in helping to prioritize the need for the sustainability of health systems and for the assessment of innovative medical technologies like telemedicine or gene therapy.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
