

Special Issue

The Health and Well-Being of Youth: Evidence from the COMPASS System

Message from the Guest Editors

This Special Issue calls for papers that intend to explore risk factor onset or co-occurrence, or that evaluate natural experiments on student health and well-being using data from the COMPASS system. These papers can take a variety of forms (brief reports, empirical papers, case studies) and can use a variety of methodological approaches (quasi-experimental models, latent transition models, structural equations models, etc.). Graduate trainee manuscripts are considered a priority in this call. Interested researchers can request access to COMPASS tools and data via an online application system (<https://uwaterloo.ca/compass-system/information-researchers/data-usage-application>).

Guest Editors

Prof. Dr. Scott Leatherdale

Dr. Karen Patte

Prof. Dr. Slim Haddad

Prof. Dr. Guy Faulkner

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
