

## Special Issue

# The Health and Well-Being of Youth: Evidence from the COMPASS System

### Message from the Guest Editors

This Special Issue calls for papers that intend to explore risk factor onset or co-occurrence, or that evaluate natural experiments on student health and well-being using data from the COMPASS system. These papers can take a variety of forms (brief reports, empirical papers, case studies) and can use a variety of methodological approaches (quasi-experimental models, latent transition models, structural equations models, etc.). Graduate trainee manuscripts are considered a priority in this call. Interested researchers can request access to COMPASS tools and data via an online application system (<https://uwaterloo.ca/compass-system/information-researchers/data-usage-application>).

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
