Healthy Aging: Past and Future Challenge

Message from the Guest Editor

The continuous growth of older populations, as a consequence of demographic changes in Europe, is a huge challenge. To prevent costly and negative impacts effects on the population as a whole, it is crucial that the European societies increase their knowledge of promoting good health among older people, to promote good health and a better quality of life in later stages. This Special Issue will evaluate the societal challenges of healthy aging, its impact in recent years, and future steps.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
