

Special Issue

Hyperglycaemia in Pregnancy: Detection, Management and Postnatal Care in Rural Communities

Message from the Guest Editors

We are organising a Special Issue on "Hyperglycaemia in Pregnancy: Detection, Management and Postnatal Care in Rural Communities" in the International Journal of Environmental Research and Public Health, a peer-reviewed journal that publishes articles and communications in the interdisciplinary area of environmental health sciences and public health. For detailed information on the journal, we refer you to <https://www.mdpi.com/journal/ijerph>.

This Special Issue will explore the on-the-ground realities of screening and managing hyperglycaemia in pregnancy and the impact on outcomes for women living in regional, rural and remote communities and their health services. The issue is open to any topic related to hyperglycaemia in pregnancy for women living in regional, rural and remote communities.

Guest Editors

Dr. Julia Marley

Ms. Emma Jamieson

Dr. Andrew Kirke

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
