

## Special Issue

# Energy Sector Pollution and Health Promotion

### Message from the Guest Editors

This Special Issue aims to convene transdisciplinary research—integrating environmental sciences, public health, epidemiology, social sciences, economics, and public policy—with the aim of highlighting solutions, interventions, and strategies that demonstrate direct co-benefits for human health. All submitted articles are expected to demonstrate how their results directly impact health promotion, whether through risk reduction (including those of a climatic nature), the improvement of quality of life, or by informing the formulation of healthier public policies, invariably framing their findings within a pertinent global context.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
