Unveiling Chronic Pain: Understanding Prevalence, Management, Psychiatric Comorbidity, and Inflammatory Mechanisms

Message from the Guest Editors

Chronic pain affects approximately 20% of the world's population, thus posing both a prevalent and a daunting healthcare challenge. This Special Issue critically synthesizes the current knowledge on the global burden of chronic pain, elucidating its intricate association with psychiatric disorders and the emergent insights into the role of inflammation, as well as investigating how biological, behavioral, psychosocial, and environmental factors profoundly affect individuals suffering from chronic pain, ultimately impacting their quality of life. By encapsulating diverse perspectives and fostering cross-disciplinary dialogue, this Special Issue is devoted to addressing the multifaceted challenges posed by chronic pain. It seeks to advance the healthcare field by integrating various research strands into a coherent framework that enriches our comprehension of this complex condition.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

School of Society and Culture, Adelaide University, Adelaide 5001,
Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
