

Special Issue

Promoting Well-Being, Health Equity, and Citizenship through Inclusive Democratic Innovation

Message from the Guest Editors

There is an urgent need for political consensus to achieve sustainable development of societies. This includes the quest for equal opportunities for citizens to achieve wellbeing. However, political parties and political views are becoming more polarized, people are becoming more disengaged, and those affected by low levels of wellbeing tend to be excluded from democratic processes. The voices of excluded citizens need to be included and recognized if democracy is to pursue wellbeing for all. The inclusion of such groups is a promising approach to reducing inequities and to building strong foundations for more sustainable development of societies and deepening of democracy, aligned with social justice and wellbeing of societies. Democratic innovation is needed—the question is, how? This Special Issue welcomes papers examining democratic innovation aiming to promote well-being, health equity, and citizenship for all. For this Special Issue, we invite you to submit articles on high-quality original research, reviews or perspective articles that provide new and robust discoveries that broaden current knowledge. The relevance for practice should be emphasized.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
