

## Special Issue

# Advances in Indigenous Primary Health Care Policy

### Message from the Guest Editors

Despite centuries of colonial oppression and marginalization (Anaya, 2014), Indigenous nations have been engaging and continue to engage in advocating for self-determination over matters that impact their overall health and wellbeing. The adoption of the United Nations' Declaration on the Rights of Indigenous Peoples (United Nations, 2007) galvanized these efforts. In some countries, governments have responded with, and in some cases co-created, responsive health policy.

In this Special Issue, we are inviting papers showcasing areas of Indigenous innovations and responsive health policies. Aligned with Indigenous conceptualizations and understandings of health, we welcome papers focusing on health systems; environmental issues; language and cultural protection and revival; traditional practices, healing, and medicine; and examples of implementing Indigenous models of governance and accountability to improve health outcomes

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
