

## Special Issue

# Health and Wellness for Indigenous Peoples

### Message from the Guest Editors

Ensuring that Indigenous people are leaders and partners in determining these solutions is a key requirement for self-determination, as well as to ameliorate the long history of unethical research practices experienced by Indigenous peoples. To honour Indigenous knowledge and recognise the cultural strength and lived experiences of Indigenous peoples, we welcome submissions developed or co-developed by and with Indigenous peoples. All papers submitted for consideration should include a paragraph in the Methods section briefly detailing: (a) the nature of the engagement, and the involvement and leadership of Indigenous people and communities within the project; (b) ethics and governance considerations in relation to Indigenous peoples; and (c) whose priorities are reflected in the work.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
