Special Issue

Inequalities in Health and Healthcare

Message from the Guest Editors

Numerous studies have documented avoidable differences in health, within and between populations. The focus has often been on individual determinants, such as gender, age and ethnicity. In addition, to tackle inequalities, there is a need to move beyond measuring; to understand why these inequalities arise and how they can be addressed.

This Special Issue seeks to extend the parameters of inequalities research in health and healthcare beyond measuring and documenting inequalities. Reviews, observational studies, and quasi-experimental and other evaluation designs (using quantitative, qualitative or mixed methods), focusing on the following would be particularly welcomed.

- understanding inequalities across health and care systems or at structural levels
- methodological developments to understand drivers of inequalities
- efforts to reduce inequalities, particularly in evidencebased healthcare or public health policy and practice
- understanding and mitigating the adverse impact of the COVID-19 pandemic on inequalities

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers.

Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation, Richard N. Dixon Research Center, Morgan State University, Baltimore, MD 21251, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
