

Special Issue

Inequalities in Mental Health among Adolescents/Children and Effective Interventions

Message from the Guest Editors

This Special Issue aims to provide the best up-to-date evidence on the mental health of children and adolescents and how it varies within countries and between countries. What is the relative contribution of risk factors to outcomes, and which of these factors is amenable to change and intervention? Are we really seeing an increase in prevalence or is the changing cultural context around mental health and open dialogue that is driving greater disclosure? How would we find it out? Where should our focus be, for our interventions to support children? What can society do, what should parents do, and what should schools do? We invite papers on any of the above themes.

Guest Editors

Dr. Angela J.M. Donkin

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

School of Society and Culture, Adelaide University, Adelaide 5001,
Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
