

Special Issue

Infectious Diseases & Epidemiology

Message from the Guest Editor

We are organizing a Special Issue on "Infectious Diseases & Epidemiology" (IJERPH, IF 2.468, ISSN 1660-4601). Details about submission dates and all technical details are provided. In these difficult times with pandemic and crises in many sectors epidemiologic evidence for public health purposes is especially important. We hereby invited all interested scientists and public health workers to submit papers. Do not forget that infectious diseases can be much more than Covid-19! In these times we discover that very simple rules about hand washing and distance keeping are extremely effective in prevention of other infectious diseases, e.g., the annual flu coming to all of us. This special issue can shed light on and provide new insight in the complicated game between the human race and their microbial surroundings.

Guest Editor

Prof. Dr. Jon Øyvind Odland

Department of Public Health and Nursing, UIT The Arctic University of Norway, 9037 Tromsø, Norway

Deadline for manuscript submissions

closed (30 June 2021)

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
