Special Issue Injury Prevention in Sport

Message from the Guest Editor

This Special Issue of the International Journal of Environmental Research and Public Health, "Injury Prevention in Sport", offers an opportunity to publish multi-disciplinary injury prevention research. We are interested in high-quality original research and review papers related to injury prevention across different sports and age groups, including injury surveillance studies, studies that advance knowledge towards understanding injury etiology and mechanisms, and studies testing new or evolving injury-risk mitigation measures. We also welcome papers related to sports injury prevention knowledge translation, particularly papers investigating the extent of the real-world implementation of proven interventions and strategies for promoting the transfer of injury prevention evidence into practice and policy. All manuscripts will undergo peer-review by experts in the field before acceptance for publication.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief
