

## Special Issue

# The Injustices: Social Determinants of Vulnerability to Unhealthy Behaviours

### Message from the Guest Editors

The prevalence of lifestyle-related diseases and psychosocial distress is higher among the poor, discriminated and marginalised. Some authors have attributed this to the failure of society, social policies and social institutions to tackle the uneven distribution of social goods and power, as well as socioeconomic discrimination against the marginalised. Others assert that social discrimination and lack of opportunities increase the vulnerability to maladaptive behaviours such as unhealthy relationships with food, tobacco smoking, drugs and alcohol dependence. The aim of this Special Issue is to highlight pioneering research that explores the understanding of and response to the inequalities experienced by socially disadvantaged and marginalised communities. This includes but is not limited to the homeless; ethnic minorities; migrants, asylum seekers, and refugees; lesbian, gay, bisexual, transgender, queer, and two-spirit (LGBTQ2S); substance misusers; as well as survivors of gender-based violence and of torture and ill-treatment.

### Guest Editors

Prof. Dr. Mzwandile Andi Mabhala

Dr. Rafael Van Den Bergh

Prof. June Keeling

Prof. John Middleton

### Deadline for manuscript submissions

closed (30 November 2022)

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
