

Special Issue

Innovation in Environmental Protection and Public Health: Social, Economic and Ecological Approaches

Message from the Guest Editors

Innovation is pervasive in all industries and throughout society. Innovative actions can affect public health and have the potential to reduce environmental pollution, energy, water, and fuel use. Such activities are overwhelmingly consistent with the philosophy of sustainable development and can be considered from social, economic, and environmental perspectives. Research conducted in both urban and rural areas in developing and developed countries can provide valuable insights into environmental protection and public health in the context of innovation. This Special Issue is open to all topic areas related to the environmental and public health impacts of innovation.

Guest Editors

Prof. Dr. Józef Ober

Dr. Piotr Sakiewicz

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
