

## Special Issue

# Intrauterine Environment and Child Health

### Message from the Guest Editor

The intrauterine environment plays a critical role in child health. Metabolic and hormonal dysfunction during pregnancy as a causative factor of poor development is an exciting and complex research area. The concept of the critical development period is based on the idea that exposure to certain environmental factors during pregnancy will result in permanent changes in brain function and child development. The mechanisms underlying this risk are not understood. This Special Issue is open to any subject area relating to the intrauterine environment of a pregnant mother and her child. We aim to publish rigorous original empirical research and systematically constructed reviews and meta-analyses that will advance the science and care of children at high risk of poor health and development. Novel and innovative research in this area is welcomed.

### Guest Editor

Dr. Diana Arabiat

School of Nursing and Midwifery, Edith Cowan University, Perth, WA 6027, Australia

### Deadline for manuscript submissions

closed (31 December 2021)

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
