

Special Issue

Health Disparities and Health Literacy: Bridging the Gap

Message from the Guest Editor

This Special Issue, titled *“Health Disparities and Health Literacy: Bridging the Gap”*, seeks to advance research that explores the intersection of health literacy and health equity. We invite empirical studies, reviews, and theoretical contributions that examine innovative strategies to enhance health literacy, reduce inequities, and improve health outcomes across diverse populations. Topics of interest include, but are not limited to, culturally tailored health communication, digital health literacy, patient education interventions, policy initiatives, and community-based approaches. By bringing together multidisciplinary perspectives, this issue aims to provide actionable insights that can inform practice, policy, and research, ultimately contributing to a more equitable healthcare landscape.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief
