

## Special Issue

# Air Pollution Reduction to Improve Health Outcomes

### Message from the Guest Editor

Air pollution remains a significant cause of death globally, at about 9 million persons per year. Although the myriad health effects of air pollution are well known, it is seen by many as an intractable or even necessary problem associated with industrialization. We are seeking studies demonstrating the latest efforts in the translation of air pollution health research into practical solutions, whether at the level of technological innovation or policy, for inclusion in a Special Issue of *IJERPH*. Studies demonstrating the opportunities presented by interdisciplinary research and advocacy will be prioritized. Studies demonstrating positive health outcomes following the reduction of criteria air pollutants will also receive strong consideration. We invite researchers to seek out interdisciplinary collaborations in pursuit of publications suitable for the Special Issue. Keywords

- air pollution
- PM2.5
- PM10
- NO2
- SO2
- policy
- advocacy
- interdisciplinary
- translational
- reduction
- innovation
- health

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
