Japan: Evaluating the Effectiveness of Tobacco Control Policies and the Use of Heated Tobacco Products

Message from the Guest Editors

Relatively few scientific articles have focused on the impact of Japan's tobacco control efforts, but with more recent possible changes in policies being planned (e.g., smoke-free venues at the 2020 Tokyo Olympic Games), this is an ideal time for research on where Japan stands now in tobacco control policies and on the impact of its tobacco control measures to date.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

Centre for Public Health, Equity and Human Flourishing, Torrens
University Australia, Adelaide 5000, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
