

## Special Issue

# Concentrated Epidemics: The Epidemiology of HIV/AIDS Among Key Populations

### Message from the Guest Editor

This Special Issue, “Concentrated Epidemics: The Epidemiology of HIV/AIDS Among Key Populations”, aims to advance population-based and environmental public health perspectives on HIV/AIDS by examining the epidemiological patterns, contextual determinants, and responses of health systems that affect key populations. We welcome original research, systematic reviews, and policy- or methodologically oriented studies addressing HIV incidence and prevalence, social and structural risk factors, access to prevention and care, implementation of interventions such as pre-exposure prophylaxis (PrEP) and harm reduction, treatment outcomes, and co-infections.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
