# Breast Health and Cancer Awareness: Addressing Breast Cancer Disparities from Etiology to Survivorship

### Message from the Guest Editor

The surge in global breast cancer incidence and mortality underscores the urgency for enhanced awareness, prevention, and treatment. Despite advancements in breast cancer research, the complex interplay of genetic predispositions, environmental factors, and socioeconomic and racial disparities further exacerbates the challenge. Understanding breast health demands not only examining risk factors and health behaviors but also social determinants and social drivers of health that contribute to breast cancer outcomes among diverse populations. The use of various research designs and methods across the breast cancer control continuum is critical for confronting breast cancer disparities and achieving optimal breast health and equitable care.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
