

Special Issue

Quality of Life, Needs and Demands of Dentists, Students and Patients in the New Era of Modern Dentistry

Message from the Guest Editor

The dental field is continuously evolving. New technologies are constantly increasing the size and influence of their place in the daily practice of the dental profession, and push older and more conventional protocols aside to make space for new and innovative ones. The dental profession is heavily affected by social and environmental changes in our society. Some of these changes derive from beneficial changes and some from adverse changes, like those imposed upon us by the COVID-19 pandemic. As professionals and as teachers in academic institutions, it is our mission to strive towards the best treatment and highest education standards, regardless of the environmental situation forced upon us. This Special Issue invites researchers aiming to study and improve the dental profession in terms of improving patients' and professionals' quality of life and well-being, professional performance and knowledge, as well as dental undergraduates' education in this challenging and constantly changing time.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

School of Society and Culture, Adelaide University, Adelaide 5001,
Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
