Prevention and Management of Sexually Transmitted Disease

Message from the Guest Editors

Sexually transmitted diseases (STDs) remain a significant public health challenge worldwide, affecting millions of individuals annually. Despite advancements in medical research and public health initiatives, the incidence of STDs continues to rise in many regions, underscoring the need for innovative prevention strategies and effective management practices. Addressing these challenges is crucial to reducing the global burden of STDs and improving public health outcomes.

- Innovative Prevention Strategies: new approaches to education, vaccination, and behavioral interventions aimed at reducing the transmission of STDs;
- Advances in Diagnostic Techniques: the development and evaluation of novel diagnostic tools and methods for the early detection and monitoring of STDs;
- Treatment and Management: research on new treatments and the management of drug-resistant infections for patients with STDs;
- Public Health Policies and Programs: the evaluation of public health interventions, policy frameworks, and community-based programs designed to combat STDs;
- Sexual Health Education: studies on the effectiveness of sexual health education programs in STD prevention.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
