

## Special Issue

# Social Support for Social Services: Addressing the Well-Being of Social Workers

### Message from the Guest Editor

Social workers work with multiple and diverse populations, handling problems at all levels (individual, family, community, and policy). In addition, they intervene in a context that is sometimes complex, such as in cases of war, crisis, and conflict. The professional spotlight is often directed to the client's well-being and less to the well-being of the social worker. Therefore, this Special Issue will focus on social workers and is designed to explore the critical role of social support in improving the well-being and professional effectiveness of social work. It will examine various aspects of social support in the context of social services, focusing on how it affects the mental health, job satisfaction, and overall quality of life of social workers.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
