

Special Issue

Dental Health in Children and Adolescents

Message from the Guest Editors

It is an honor to present this Special Issue of the *International Journal of Environmental Research and Public Health* entitled “Dental Health in Children and Adolescents”, as guest editor and co-guest editors. Dental health is part of the general health of all individuals and should be accessible to everyone, regardless of age, ethnicity, sex or economic status, as it is essential for a good quality of life. Among the pathologies found in the oral cavity, dental caries is the most prevalent, chronic, non-communicable disease worldwide. The World Health Organization (WHO) indicates that 60–90% of children are affected by dental caries, being one of the main causes of premature tooth loss in children, which can cause damage to the primary dentition and future permanent dentition. In this Special Issue, original papers from various subjects (caries in children, behavioral management, MIH) that employ various research methods (retrospective studies, prospective longitudinal studies, randomized controlled trials, systematic and narrative reviews, meta-analyses, clinical cases) focused on childhood caries prevention and management will be accepted.

Guest Editors

Dr. Francisco Guinot Jimeno

Dr. Monica Miegimolle Herrero

Dr. Alberto Adanero Velasco

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
