

Special Issue

Human Exposure to Environmental Contaminants and Its Health Implications

Message from the Guest Editors

This Special Issue is an essential tool for collecting original articles providing updated knowledge on the potential health risks of human exposure to environmental toxic substances. Authors are encouraged to submit original research articles describing novel findings related to one of the following goals:

- Human health implications of environmental contaminant exposition (including tumours, endocrine, neurological and reproductive pathologies);
- Assessments of current levels and patterns of exposure to contaminants in occupational and environmental settings, including indoor environments;
- Human biomonitoring for toxic substances.

Submissions of theories, general commentaries, and articles indirectly related to the above-listed topics will be considered as well. **Keywords** human health; environmental pollutants; human contaminant exposure; particulate matter absorption; human pathologies related to environmental pollution

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
