

Special Issue

Research on Maternal and Reproductive Health

Message from the Guest Editors

Science and medicine have pushed the frontiers of maternal and reproductive health. The SARS-CoV-2 pandemic, on the other hand, has posed unprecedented challenges to the entire system of health care provided in the perinatal period. This Special Issue will present studies in various fields related to women's health, with a particular focus on the interdisciplinary aspect of maternal and reproductive health, especially in the context of the current pandemic situation, addressing such issues as:

- factors affecting women's health in the perinatal period and reproductive health, including fertility and infertility;
- determinants and risks of maternal and reproductive health, pregnancy, labour and puerperium complications;
- implications of pregnancy for women's health, association between women's lifestyles and perinatal outcomes; psychosocial resistance resources of women in the procreation period;
- challenges related to maternal and reproductive health;
- the impact of the COVID-19 pandemic on perinatal care and maternal and reproductive health;
- and the application of telemedicine and telehealth technologies in obstetrics.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief
