

Special Issue

Mental Health in Agriculture

Message from the Guest Editors

It is well-established that agriculture is a hazardous industry; however, much of the focus to date has been on the physical risks. The mental health of people working in agriculture (e.g., farmers, ranchers, farm workers, and agribusiness) remains an important gap in knowledge. This Special Issue will focus on the mental health experiences of farmers, ranchers, and agricultural workers. Articles in this Special Issue will relate to the large scope of mental health in agriculture. This could include but is not limited to original research on prevalence, risk/preventative factors, and/or interventions (e.g., curriculum, training), literature and/or systematic reviews and meta-analyses, and other types of studies. Articles could be qualitative, quantitative, or mixed methods in nature.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
