

Special Issue

State-of-the-Art of Environmental Microbiology in India

Message from the Guest Editors

The aim of this Special Issue is to provide a comprehensive view on up-to-the-minute developments of environmental microbiology in India. Research articles which provide consolidated state-of-the-art findings in this area are, therefore, solicited for this issue. It is going to serve as a platform for showcasing the expertise of the motivated scientists and researchers of India working in the area of environmental microbiology and allied sectors. This much awaited Special Issue aims to impart a vision for the advancement of science with a special focus on development of environmental microbiology research in India. The Special Issue has a mission of integrating researchers, scientists, and academicians across the Indian subcontinent to promote research in diverse areas of environmental microbiology and to establish a meaningful communication among aspiring and senior microbiologists.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
