## Monitoring and Measurement in Child and Adolescent Mental Health

## Message from the Guest Editors

Over half of young people will experience mental health difficulties during childhood and adolescence. Mental health problems (e.g., depression, anxiety) are one of the leading causes of illness or disability for young people worldwide. Mental health problems in young people have been exacerbated during the COVID-19 pandemic. To effectively support young people's mental health—through self-care, the community, school, or specialist services—we need to be able to monitor and measure child and adolescent mental health. We are calling for papers for a Special Issue on Monitoring and Measurement in Child and Adolescent Mental Health. Primary and secondary (e.g., meta-analysis) research studies are welcome.

## **About the Journal**

## Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

## Editor-in-Chief

Prof. Dr. Paul R. Ward

Centre for Public Health, Equity and Human Flourishing, Torrens University Australia, Adelaide 5000, Australia

## **Author Benefits**

## **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.
