# Evidence-Based Relationship Factors in the Diagnosis and Treatment of Mood Disorders

### Message from the Guest Editors

Mood disorders are the most common types of mental disorders and one of the leading causes of disability worldwide. Psychotherapies are effective in producing behavioral and lifestyle changes essential to relapse prevention, long-term maintenance, and promoting positive function in people with mood disorders, yet there is still much to improve in our understanding, management, and treatment of mood disorders from a psychological perspective. An efficient assessment process is essential because it leads to more accurate diagnosis, better treatment matching, increased patient engagement, and enhanced outcomes. However, to be fully effective the evidence-based assessment should be 'humanized' because both diagnostic and psychotherapeutic processes take place inside the patient-clinician relationship. The latter's technical and relational parts are constantly and reciprocally interacting; and the relationship accounts for process and outcome variance in and of itself. Full Paper

Submission Deadline: 30 June 2022

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
