Myocardial Infarction: Prevention and Treatment

Message from the Guest Editors

Cardiovascular diseases are the leading cause of death globally, and this record is linked to a number of risk factors that, acting alone or in integrated way, are responsible for the development and progression of atherothrombotic disease and its complications. Ischemic heart disease is also considered a complex disease as it is conditioned by both environmental factors and multiple genetic influences. Despite significant improvements over the past decades, acute myocardial infarction remains a major cause of mortality and morbidity and a major source of expense for the National Health System.

The aim of this Special Issue is to offer the readers the best overview about prevention and treatment of myocardial infarction in its many ways in order to give a global and complete vision of the problem.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
MD 21251, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
