Special Issue

Challenges in Global Health: Environmental Perspectives

Message from the Guest Editor

The Special Issue will focus particularly on research into understanding such global health challenges which uses principles, concepts, and methods from geographic and spatial epidemiology. For example, health inequalities are spatially defined, related to area demography and to pure place effects (i.e. composition and context), and such spatial heterogeneity is an important consideration in planning effective healthcare. Differential exposure to environmental risks similarly implies spatially varying burdens and vulnerability. Keywords

- global health challenges
- health and the environment
- health inequalities
- geographic epidemiology
- spatial health inequalities
- pandemics

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul R. Ward

Centre for Public Health, Equity and Human Flourishing, Torrens University Australia, Adelaide 5000, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
