

Special Issue

Nursing Practice in Primary Health Care

Message from the Guest Editors

This Special Issue of *IJERPH* provides an opportunity to examine evidence-based strategies and solutions that enhance primary healthcare delivery in all healthcare settings, including geographically rural and remote areas. We welcome papers that explore the successful integration of innovative healthcare models that improve patient access, the continuity of care, and health outcomes. Submissions focusing on practical and scalable solutions to address workforce shortages—such as new models of care, interprofessional collaboration, and policy initiatives—are particularly encouraged.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief
