

## Special Issue

# Role of Breastfeeding in Promoting Maternal and Child Health: Global Perspectives

### Message from the Guest Editor

Breastfeeding research is vital to advance maternal and child health by testing, validating and/or explaining the evidence-based strategies, policies, practices and programs that can promote, protect and support breastfeeding and improve maternal-child health. For this Special Issue, we are seeking research papers that showcase the crucial role of breastfeeding in improving maternal-child health in diverse care settings. Submissions are welcome from all around the world.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
