

## Special Issue

# Nonparametric Statistics and Machine Learning with Applications in Health Studies

### Message from the Guest Editors

Nonparametric statistics and machine learning are two popular research fields which investigate the relationship between response variables and a set of risk factors in Medical Studies. Recently, both of these approaches have seen a significant development. The main target for this issue is to highlight new developments in these two areas mainly focusing on applications in health research.

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
