

## Special Issue

# Nutrition, Lifestyle and All-Cause, Cardiovascular Disease and Cancer Mortality

### Message from the Guest Editors

In recent years, cardiovascular diseases and cancer have been the main causes of morbidity and mortality worldwide. Dietary habits and lifestyle represent the main modifiable determinants of health. In this sense, nutrition and lifestyle interventions such as physical activity or conductual therapies can play an important role in the prevention of cardiovascular diseases, stroke, diabetes, and some types of cancer. This Special Issue of the *International Journal of Environmental Research and Public Health* entitled “Nutrition, Lifestyle, and All-Cause, Cardiovascular Disease and Cancer Mortality” is focused on the role that nutrition and lifestyle have on all-cause, cardiovascular disease and cancer mortality. This Special Issue welcomes the submission of manuscripts, either describing original research or reviewing the scientific literature, focused on the relationship between dietary habits and/or lifestyles in mortality.

### Guest Editors

Dr. Laura Torres-Collado

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
