

Special Issue

State-of-the-Art of Occupational Safety and Health in UK

Message from the Guest Editors

In the United Kingdom (England, Scotland, Wales, and Northern Ireland), occupational health and safety is affected by Brexit, the United Kingdom's withdrawal from the European Union that provided the health and safety framework within which the UK government, employers, and trade unions operated. This Special Issue welcomes the submission of papers on UK health and safety challenges and drivers from any discipline, including allied health professionals and health and safety practitioners. Geographic, historical, and occupational comparisons are especially welcome. Topics could relate to regulatory, organisational, technical, methodological, or clinical themes. Papers might focus on policy, epidemiology, occupational hygiene, ergonomics, occupational medicine, or risk assessment and management. Of particular interest would be papers that shed light on how COVID-19 has, or has not, altered the occupational health and safety terrain, how occupational health and safety research, regulation, and practice are functioning in a post-Brexit world or plan to do so, and how socio-economic disparities in occupational health and safety are being addressed.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
