

## Special Issue

# Health Promotion for Older Adults

### Message from the Guest Editor

Healthy aging and active aging are recognized as important strategies for responding to the trend of global aging and increasing health care expenditure. Successful aging is viewed as a paradigm for an individual's healthy aging, and the World Health Organization and European Union also suggest active aging policies to promote health in older people. Furthermore, age-friendly cities provide physical and social environments to promote active aging, and gerontechnology and artificial intelligence are applied to assist health promotion for frail, older adults. To promote older people's health in physical, mental, and social dimensions from either behavioral, environmental, or technological aspects, evidence-based research and policy suggestions are highly needed. This Special Issue, "Health Promotion for Older Adults", invites submissions of studies that provide findings and policy suggestions for the promotion of health and well-being in older adults, in order to promote healthy aging and quality of life.

### Guest Editor

Prof. Dr. Hui-Chuan Hsu

School of Public Health, Research Center of Health Equity, College of Public Health, Taipei Medical University, Taipei 11031, Taiwan

### Deadline for manuscript submissions

closed (22 March 2023)

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
