Special Issue

Physical Activity Behaviour during Pregnancy and Postpartum

Message from the Guest Editors

This Special Issue seeks manuscripts which advance our understanding of physical activity behaviour during and after pregnancy, including but not limited to: the use of novel, appropriate methods to measure and assess physical activity; factors that influence physical activity behaviour (from individual to policy levels factors) and interventions that encourage women to be active throughout the antenatal and postpartum period. Both qualitative and quantitative studies and reviews will be considered, with particular focus on theory, innovative research methods and understudied populations (including ethnically, culturally, economically, and prepregnancy weight status diverse populations).

Guest Editors

Dr. Ellinor Olander

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou

RCMI Center for Urban Health Disparities Research and Innovation, Richard N. Dixon Research Center, Morgan State University, Baltimore, MD 21251, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
