

Special Issue

Physical Activity and Sedentary Behaviour in Children and Youth

Message from the Guest Editors

For this Special Issue in *IJERPH*, we especially welcome studies carried out in children/youth population involving the following topics:

- Physical activity/sedentary behavior assessment and surveillance in the context of recommendations;
- Physical activity/sedentary behaviors and mental health;
- Psychosocial correlates of physical activity and sedentary behaviors;
- Physical literacy studies;
- Neighborhood environment—built and social, as factors influencing choices leading to physical activity/sedentary behaviors;
- Gross motor skill development;
- The association between gross motor skills and physical activity/sedentary behaviors;
- Screen- and sitting time correlates;
- Active/passive transportation and physical activity levels;
- The role of sleep duration and sleep behaviors in children and adolescents' energy expenditure behaviors.

Guest Editors

Dr. Hanna Nałęcz

Dr. Talita Honorato-Rzeszewicz

Dr. hab. Ida Laudańska-Krzemińska

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
