Addressing Maternal Morbidity and Mortality: Innovations in Antenatal and Postnatal Care

Message from the Guest Editor

High-quality antenatal care that includes not only risk assessment but also education could decrease the risk of life-threatening complications. Because many of the deaths occur following birth, better care during the post-partum period is also essential for reducing maternal mortality and morbidity. To that end, this Special Issue includes innovations in antenatal and postnatal care that can be implemented in an effort to improve maternal outcomes globally.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
