

Special Issue

Promoting Sustainable Practice within the Built Environment by Using Niche Products, Services and Disruptive Technologies

Message from the Guest Editors

This Special Issue focuses on disruptive, niche and specialist products, services and technologies that allow improved control and optimization of the built environment using an interdisciplinary sustainable approach across a range of sectors. It is recognized that many of the issues facing urban mega-cities within emerging economies can only be addressed using this sustainable interconnected approach whilst also addressing the relevant and related SDGs.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
Richard N. Dixon Research Center, Morgan State University, Baltimore,
MD 21251, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
