

Special Issue

Patient Satisfaction with Health Services

Message from the Guest Editor

This issue of IJERPH focuses on research and experiences related to patient satisfaction measures and how patients are involved in the outcome assessment. This may include a description of new challenges, approaches or instruments to assess patient satisfaction in hospitalization, inpatient and outpatient surgery, mental health, primary care, telemedicine, the results of implementing a patient-centered approach, the impact of new interventions to increase patient satisfaction, the experiences of patients with chronic conditions, or the assessment of the support received to overcome the burdens that caregivers of these patients suffer. In this special issue, we invite researchers in public health, management, quality assurance, epidemiology, health economics, and other social sciences to submit high quality empirical papers or systematical reviews related to the issues in this research area.

About the Journal

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

IJERPH provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

Editor-in-Chief

Prof. Dr. Paul B. Tchounwou
RCMI Center for Urban Health Disparities Research and Innovation,
