

## Topical Collection

# Contemporary Challenges and Problems in Health

### Message from the Collection Editors

We observe the intensive development of health-supporting science (medicine, pharmacy and health sciences). New therapeutic (not only drug), diagnostic and logistic technologies (supporting medical organizations and the work of medical professionals) are being developed. This progress allows us to respond to new health problems and to better recognize and treat them. We must share discoveries and knowledge, because only in this way will our patients be safer and healthier. This collection is designed to help communicate important information about diseases, technologies, and observations in all aspects to help heal patients. We want to show that the knowledge of problems and new technological solutions helps and accelerates the development of medicine and health sciences. Therefore, we welcome all articles, systematic reviews and other original productions that address research topics related to this thematic collection. Manuscripts submitted for publication - in accordance with the requirements of the Editorial Board - will be subject to a review process.

### Collection Editors

Prof. Dr. Andrzej M. Śliwczyński

Dr. Izabela Gołębiak

Dr. Zofia Sienkiewicz

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.
