

## Special Issue

# Incidence, Risk Factors for, and Consequences of Pain, Depression, and Poor Self-Rated Health

### Message from the Guest Editor

Recommended research topics/questions could include, but are not limited to, the following:

- What is the distribution of classes of co-morbid pain, depression, and low self-rated health in the general population (or well defined non-clinical/clinic populations)? On what characteristics do those with the target co-morbidities differ from their unaffected age-mates?
- Are the characteristics of those who experience co-morbid combinations of pain, depression, and low self-rated health the same across the globe or do they differ according to such factors as country income level, cultural background, or health resource availability?
- What are the risk factors for experience of pain, depression, or low self-rated health? Are the risk factors similar for each outcome?
- Do the risk factors for experiencing co-morbid pain, depression, and low self-rated health reflect those for each outcome when occurring separately?
- To what extent are pain, depression, and low self-rated health chronically co-morbid. If not, how do changes in one condition impact levels of the others?

### Guest Editor

Prof. Dr. Jana Mossey

Department of Epidemiology and Biostatistics, Dornsife School of Public Health, Drexel University, Philadelphia, PA 19104, USA

### Deadline for manuscript submissions

closed (30 June 2021)

## About the Journal

### Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Scientific discoveries and advances in this research field play a critical role in providing a rational basis for informed decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards.

*IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality peer-reviewed journal.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Public Health, Environmental and Occupational Health)
